

Wi-Fi
SETUP
Manual

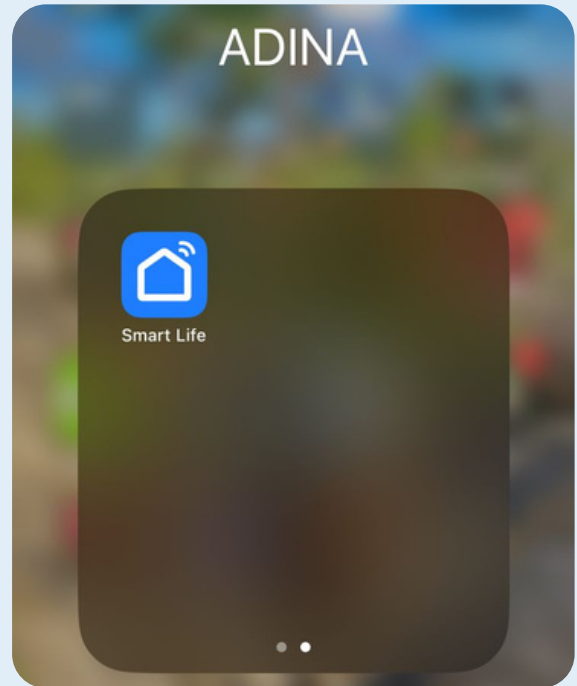

Step 1: Download the app

You are required to download the Smart Life application, created by Tuya, which is compatible with our systems.

Direct download link:

 <http://e.tuya.com/smartlife>

You may also scan the QR code found in the device's printed manual, which will direct you to the same app.

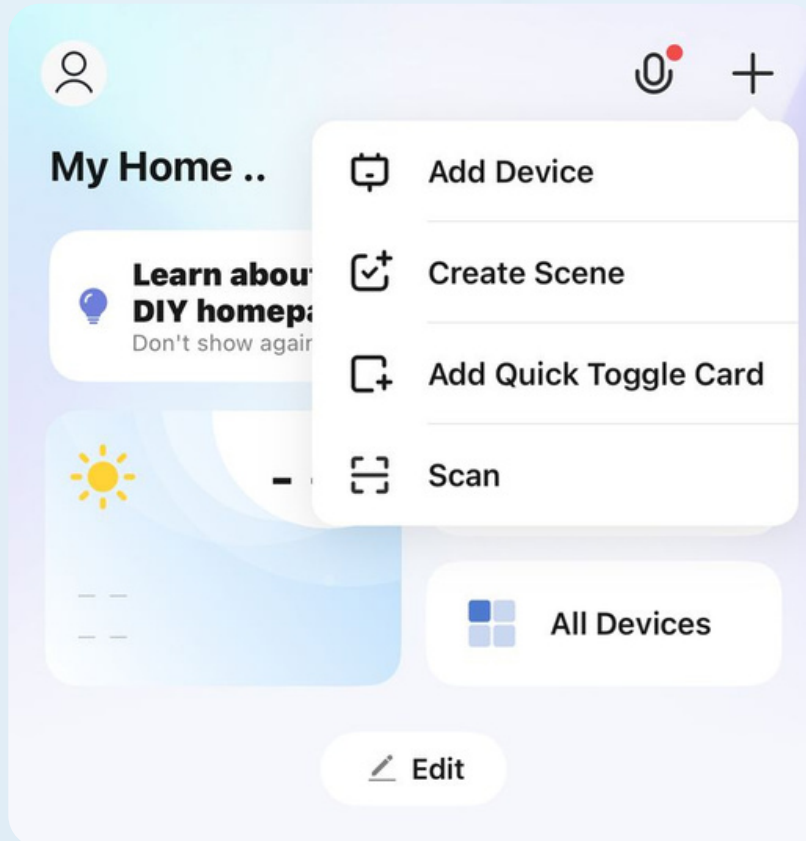

Step 2: Open the app and incorporate the device.

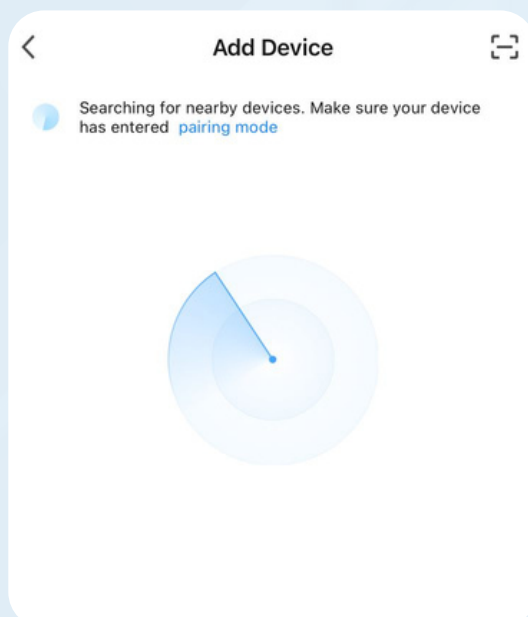

Open the **Smart Life** app on your mobile device.

Press the **(+)** button located in the upper right corner.

A menu will appear to select how to add a device. Select the first option **(Add Device)**.

A window will appear to manually select the equipment type.

Add Manually

Plug
(BLE+Wi-Fi)

Socket
(Wi-Fi)

Socket
(Zigbee)

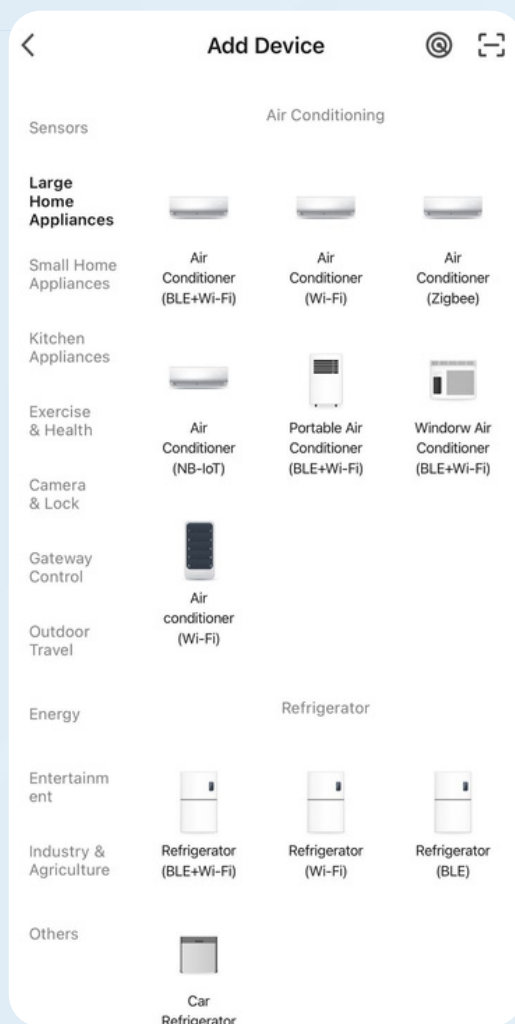

Large Home Appliances

Step 3: Select the type of equipment

Within the categories menu, select:

Large Home Appliances > Air Conditioning Wi-Fi

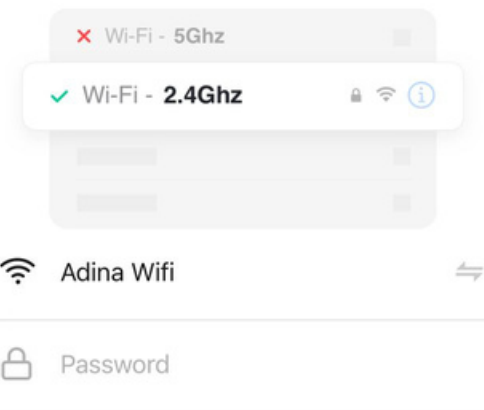

Step 4: Enter your WiFi network

Tap the WiFi air conditioner icon.
Then enter the name (SSID) and password of your 2.4 GHz WiFi network.

 **Important: Not compatible with 5 GHz networks.**

Select 2.4 GHz Wi-Fi Network and enter password.

If your Wi-Fi is 5GHz, please set it to be 2.4GHz.
[Common router setting method](#)

Select 2.4 GHz Wi-Fi Network and enter password.

Next

Step 5: Put the device in pairing mode

Now we are going to put the air conditioner in WiFi network search mode:

- On the remote control, press the "Display" button 6 times.
- You will hear a beep each time you press it.
- After the sixth beep, the device will emit a series of beeps indicating that it has entered pairing mode.
- The WiFi symbol will start blinking, either fast or slow.

Reset the device

Press and hold the RESET button for 5 seconds until the indicator blinks (subject to the user manual).

Confirm the indicator is blinking

[Reset Device Step by Step](#)

When the Wi-Fi symbol is blinking, tap the “Confirm the indicator is blinking” option in the mobile app.

Step 6: Confirm blink type

In the app, select the option that matches the type of blinking of the WiFi symbol on your unit (blink Slowly or blink quickly).

Reset the device

Press and hold the RESET button for 5 seconds until the indicator blinks (subject to the user manual).

Select the status of the indicator light or hear the beep:

Blink Slowly

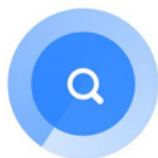

Blink Quickly

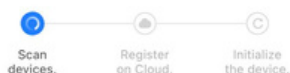

Connecting Device

Keep the network stable.

Step 7: Wait for pairing

The app will take up to 5 minutes to pair with your device.

During this time, communication will be established between the air and your cell phone.

Step 8: Customize the device name

Once the setup is complete, you can assign a name to your air conditioner, for example: “*Main Room*” or “*Office*” to facilitate control if you have multiple air conditioners.

Step 9: Ready to use!

Your smart air conditioner is now properly configured and ready to be used from your phone!
